Robert,

Coolers made it to LSASD: good temps and no broken containers. All samples for Meals analysis are accounted for. We do have a container that should be with the CLP shipment.

Sample **LCO-10S-SD CLP # DBFM7** 8 oz. glass jar  
What would like us to do with it?

Thanks,

Mike Beall

Attached are the COC pdf and xml file for 20-0334. Three coolers shipped overnight today. Fedex 771198722832.

We had to use an 8oz glass jar for one of the temp blanks .. it is marked on the lid.

Let me know if you have any questions.

Robert
